OpenCart 3.0+   Plugin

Roger.bi@flexigroup.com.au

Flexigroup

2020.6

Overview

The OpenCart 3.0+ Plugin aims to rebuild functions and modules for Humm payment and better service for OpenCart Merchants and clients

Goals and Functions

1. Add product widget

2. Add cart widget

3. Add Homepage Banner

4. Add Checkout BPI

5. Support Australia and NZ merchants

6. Support Force_Humm for NZ merchants

7. Rebuild admin consoles, style is same to other plugins for Merchants register automatically

8. Advanced Logs file build and clean log organise

9.remove unnecessary hard-coded

10. Checkout error validate

11. Review Order Status Update

12. Review API call back validate

13. Review API complete validate

Specifications

1. Admin Console for configuration of payment credential, Order Status and Countries etc, merchants also can automatically register a new account directly in the menu, Please config country, Merchant Number, Order Status and API KEY etc

Little things. Big things. Interest freeee!
Humm Payment

Humm OpenCart Documentation

If you don't have a humm merchant account you may join here

✏ Edit

Checkout Method

This allows you to switch between Oxipay and humm. New Zealand merchants should use Oxipay before the official humm launch, and switch this to humm after the launch.

Humm	Humm

Shop Details

Enter the shop details for your site.

Shop Name ❓	TestHumm1

Region	Australia

Gateway Settings

Enter the gateway settings that were supplied to you by humm/Oxipay.

Environment	Sandbox

Merchant ID ❓	30188308

OpenCart © 2009-2020 All Rights Reserved.
Version 3.0.3.3

There is a general setting section, so please configure order status (completed, failed and pending) and **enable Humm log** *option*

2. BPI Integration (home page, Product page, Card Page, Checkout Page and Land page)

2.1 HomePage

Solution:

 In upload/catalog/view/theme/default/template/common/home.twig file to add
<div class="mb-1">

```
<script
src="https://widgets.shophumm.com.au/content/scripts/more-info-small.js"></scr
ipt>
</div>
```

2.2 Card Page

Solution:

In upload/catalog/view/theme/default/template/checkout/cart.twig above below lines:

```
<div class="pull-left"><a href="{{ continue }}" class="btn btn-default">{{ button_shopping }}</a></div>
```

```
<div class="pull-right"><a href="{{ checkout }}" class="btn btn-primary">{{ button_checkout }}</a></div>
```

to add following lines:

```
{% set break = false  %}
{% set hummPrice = "" %}
{% for total in totals if not break %}
    {% if total.title == "Total" %}
        {% set hummPrice  = total.text %}
        {% set break = true %}
    {% endif %}
{% endfor %}
<div class="col-sm-4 col-sm-offset-8">
    <script src="https://widgets.shophumm.com.au/content/scripts/price-info.js?productPrice={{
hummPrice}}"></script>
</div>
```

2.3 Product Page

Solution:

In upload/catalog/view/theme/default/template/product/product.twig line 175 below to add
{% if not special %}
<script src="https://widgets.shophumm.com.au/content/scripts/price-info.js?productPrice={{ price }}"></script>
{% else %}
<script src="https://widgets.shophumm.com.au/content/scripts/price-info.js?productPrice={{ special }}"></script>
{% endif %}

2.4 Checkout BPI

Solution: BPI codes are included in the plugin due to special architecture of OpenCart

2.5 Land Page BPI

- *In the left-hand menu, navigate to Catalogue > Information.*

- *Click to blue   Icon on the top right of the page.*
- *Click on the "General" tab.*

- *In the Information Title field, enter*

- *In the Description section, click on the* </> *Button.*

3. Functions rebuilt and update

- *Add API timeout default value is 120*
- *Add Force Humm function*
- *Add Advanced log in the plugin*
- *Rebuild API call function*
- *Check out error validate etc*
- *API Call back functions validate*
- *API Complete functions validate*
- *API Cancel functions validate*

4. Installation of Plugin

V3.0+   repository: https://github.com/shophumm/humm-opencart/tree/review

Install instruction: download zip file form above repository

Step commands: https://docs.shophumm.com.au/ecommerce/opencart/

Online Specification:

https://github.com/shophumm/humm-opencart/blob/review/upload/OpenCart3.0%2BPlugin.pdf

```

  📄 appveyor.yml                             1 KB   YAML Document
  📄 README.md                           348 bytes   Markdo...ument
  📄 LICENSE                                35 KB   TextEdit
  📄 humm-opencart-review.zip              40 KB   ZIP archive
```

For Example: the plugin structures looks like above

5. Questions and Answers

Where is the Log file in the server ?

1. *upload/system/storage/logs/hummPayment.log*
2. *upload/system/storage/logs/error.log*

What are the reasons that payment can not work on the redirect ?

1. *Merchant NO and API key should be right*
2. *Environment setup should be right*
3. *Country in the admin console should be setup right*
4. *The country of Shipping address should match countries setup in the admin console of Humm payment*
5. *Signature errors*

What are the development version of Opencart

The plugin is developed on the version 3.0.3 of OpenCart
